

Aeranthos

Aeranthos is a food-grade **temperature** and **pressure** smart logger that provides you new insights regarding your containers, even when they are travelling the world.

With Aeranthos you don't need special wired readers to retrieve data from the device, simply download our app and you can instantly interact with data and upload it to the cloud.

Aeranthos uses Bluetooth Low-Energy® that provides up to 5 years of battery autonomy and it works with most smartphones on the market.

Features

- Bluetooth Low Energy® wireless communication
- Internal memory up to 6 months of data storage
